

Web Queen Training

WEBSITE CREATION COURSE

LESSON 3 ASSIGNMENT

Complete the following tasks before you move on to the next lesson. If you have any questions, contact me.

- Customize your website's menu.
 - Make sure the pages you created in the Lesson 2 Assignment are on your menu.
 - Remove any pages from your menu that aren't being used.

- Create at least two new pages for your website and add them to the menu. You can use the standard editor, the Beaver Builder or the Themify Builder.
 - Ideas for pages: Products, Services, Tools I Use, Resources, Book an Appointment, Samples, Portfolio

- (Optional) Try using the Beaver Builder plugin to create/edit a page.
 - Install the free Lite Version if you don't have it.

- (Optional) Use the Themify Builder plugin to create a new page.
 - Use the Themify Page Builder to add content to the page.
 - Save and publish the page.
 - Add the new page to your website's menu.

- Create a simple Freemium and offer it to those who sign up for your email list.

- Bonus Lessons (Under Course Resources on Course Agenda)
 - How to Set Up MailChimp Demo
 - MailChimp Plugin Demo

Other tasks:

- Email me if I can showcase your coming soon/website in training and/or on social media.
- Add icreate@designdivastudios.com to your email address book if you haven't.
- Email me at icreate@designdivastudios.com if you have any questions or have any feedback.

TIP FOR SUCCESS

Expand your brand's reach by creating and using a business page or account for social media platforms.

Building your network is an important part of your brand. If you use a business/brand page on social media, more people can find you and things directly related to your brand. Use it for business & business-related posts.

FYI, it's kinda against the rules/illegal to use a personal page for business purposes. 😬
