

Web Queen Training

WEBSITE CREATION COURSE

LESSON 4 ASSIGNMENT

Complete the following tasks before you move on to the next lesson. If you have any questions, contact me.

- Set up at least one widget on your WordPress website.

Suggestion: Add the MailMunch for MailChimp (or other mailing list plugin) to your sidebar.

- Customize one of your site's colors using CSS and hex codes.

Use www.color-hex.com or do a web search to find the HEX code of a color you adore.

- Create a password protected page for your website.

Consider using a plugin if you would like to create a membership section of your website.

Suggested membership plugin: Simple WP Membership by smp7, wp.insider

Other tasks:

- Email me if I can showcase your coming soon/website in training and/or on social media.

- Add icreate@designdivastudios.com to your email address book if you haven't.

- Email me at icreate@designdivastudios.com if you have any questions or have any feedback.

TIP FOR SUCCESS

Be prepared to handle double your current volume at any given point. When you set things in motion with passion, more will happen...a body in motion stays in motion.

Once you achieve one level, begin planning for the next. If you're prepared, the transition to the next level will be much easier and less stressful. Otherwise, you will get overwhelmed by the influx and may even stop in the middle of the wave that you should be riding up.
